ABSTRACT

Hidayah, Nur Aisyatul. 2024. A Thesis: *The Students Strategies in Improving Speaking Skill*. English Department, Social and Humanity faculty, University of Nurul Jadid. Advisor: Mohammad Sofyan Adi Pranata, M.Li

Keywords: Strategies, Speaking Skill

The importance of speaking skills in English language learning drives this study to explore the strategies applied by one of the non-English regular class students. In this context, this study aims to explore the strategies used by non-English students in improving their English speaking skills. Using a qualitative approach, with a narrative inquiry design, this study involved observation and in-depth interviews as data collection methods. Observations were conducted in stages to find out the strategies used by students at school. The interviews were structured based on the research objectives, namely to find out what strategies non-English students use to improve their speaking skills. The participants in this study were one of the non-English regular class students at Nurul Jadid State Senior High School who are still under the auspices of the Islamic boarding school. From the results of the interviews conducted, there were three strategies used by students to improve their speaking skills, namely: memory strategies, social strategies and cognitive strategies. By knowing students' strategies in improving speaking skills, teachers can integrate them into learning in speaking classes.
