## ABSTRACT

**Arifah, S. N. (2025).** *The effect of ELSA Speak on students' English speaking skills at the eighth grade of MTs Zainul Anwar Kraksaan* (Undergraduate thesis, Nurul Jadid University). Advisor: Syaiful Islam, M.Pd.

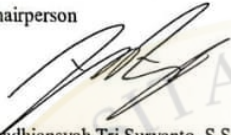

**Keywords:** speaking skills, ELSA Speak, artificial intelligence, pronunciation, MALL.

Speaking skills remain one of the most challenging aspects of English language learning, particularly for students in Islamic junior high schools with limited access to interactive oral practice. This study aimed to examine the effect of using the ELSA Speak application on improving the English speaking skills of eighth-grade students at MTs Zainul Anwar Kraksaan, focusing on pronunciation, intonation, and fluency. Employing a quantitative approach with a pre-experimental one-group pretest-posttest design, the study involved 18 students who used the ELSA Speak application regularly over the course of one week. Data were collected through oral tests administered before and after the intervention and analyzed using a paired sample t-test. The findings revealed a significant improvement in students' speaking scores, with the average increasing from 50.61 to 59.50 and a significance value of 0.013. These results indicate that ELSA Speak effectively enhances students' speaking performance. In conclusion, the integration of AI-based learning tools like ELSA Speak can serve as an adaptive and practical solution for developing speaking proficiency in English, particularly in under-resourced educational settings, and supports the broader implementation of digital transformation in language education at the secondary level.
